Sustainable Science - Recycle a Poster

This event was underwritten by a grant from Pfizer Animal Health, Kalamazoo, MI. Approximately 85 members and presenters came together to share an evening of chemistry research, beverages and light food at Bell's Eccentric Cafe. The meeting included 47 posters and a keynote address at 6 pm by Dr. Bob Gadwood entitled "Creating Chemistry Jobs in Kalamazoo: The Story of Kalexsyn."

The event featured an open bar. A modest number of chairs and table seating was available throughout the café for conversation in small groups. The event was still going strong until almost 9 pm.

Dr. Lydia Hines collecting for pure water project

Poster session coordinator, Dr. John Wendt (Pfizer Animal Health)

Keynote speaker, Dr. Bob Gadwood (President and Chief Scientific Officer, Kalexsyn)

Poster session from the back of room. Lydia Hines is congratulated in Kalamazoo as the 2011 recipient of the E. Ann Nalley Great Lakes Region Award for Volunteer Service (initially presented at the Central-Great Lakes Joint Regional Meeting in St. Louis, Oct 22, 2011).

Amy Heiser (Perrigo) explains her work to Stephen Seacrest (Pfizer Animal Health).

Kevin Douglass (WMU graduate student) with Megan Grunert (Asst Prof WMU) with Susan Stapleton (Associate Dean of CAS, WMU)

Over 45 posters were on display

Lively discussions following formalities.
