

January 2008

Attention KACS members! The Science Café series will be starting again soon. These sessions will explore the world for forensic science. Come to Bell's Eccentric Café and learn about the world of criminal forensics and pharmaceutical product forensics. Don't forget these sessions are open to the public so bring friends and family members.

Mark your calendars for the Girl Scouts Day on April 5, 2008. Contact Kim Greve if you are interested in volunteering. This is a great way to spread science to our kids.

Ever wonder if these herbs like St. John's Wart and Echinacea are safe? Come and join our spring tour speaker, Dr. David F. Weimer, who will present "Herbal Products: They're Natural but are They Safe? Examples of both beneficial and harmful compounds found in nature will be presented, along with a description of strategies that are used to isolate biologically active compounds from natural sources. Watch for your KACS communications for the date and location.
